

# Pages

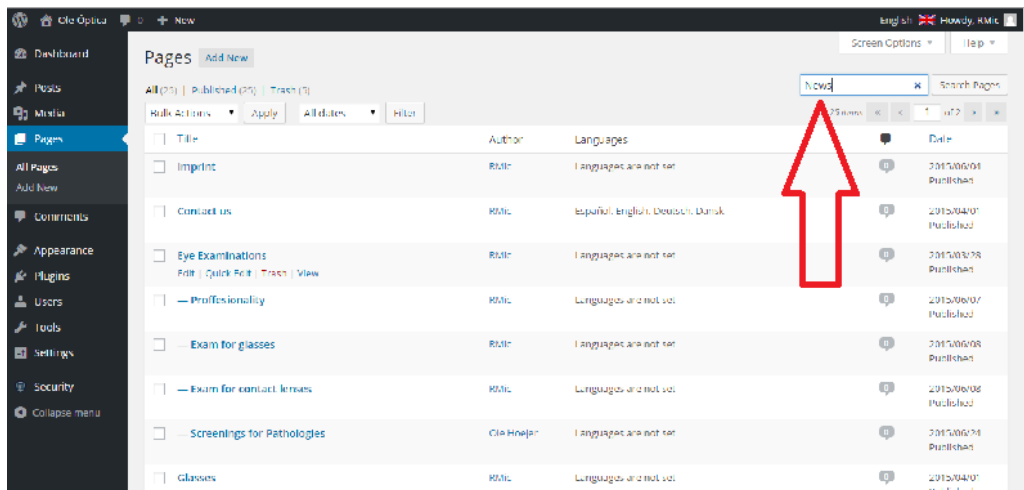

- In the Dashboard click on **Pages - All Pages** in the left sidebar menu

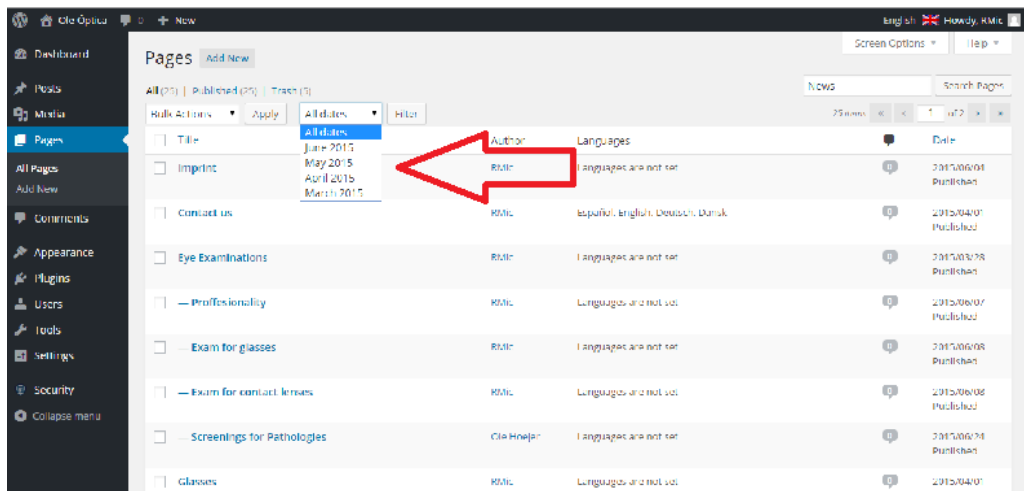

- When you click on Screen Options in the upper/right corner, a submenu scrolls down, where you can choose which elements you would like to have displayed.

- Search for a specific Page from the list by entering the page name in the search box and clicking on the *Search Pages* button

- Filter the Pages list by their creation date. Select a date range from the list and click on the *Filter* button.

- When you move the mouse over the page name in the list, a little submenu appears where you can choose *Edit* or *Quick Edit*. With *Edit* you can modify the page content, whereas with *Quick Edit* you can modify some page parameters.
